

Product Specification
Recombinant Rat Hepatocyte Growth Factor (rRHGF)

- **Source**

CHO Cell.

- **Package**

Frozen material.

Each polypropylene vial includes 1 µg of rRHGF in 100 µL of 10 mM sodium phosphate buffer pH 7.2 containing 150 mM sodium chloride and 0.1% BSA.

Sterilized by membrane filtration using a 0.22 µm Millex GV filter.

- **Purity**

More than 80% by SDS-Polyacrylamide gel electrophoresis.

- **Activity**

rRHGF (more than 1 ng/mL) stimulates the DNA synthesis of adult rat hepatocytes in primary culture.

- **Reconstitution and Storage**

Dilute to desired concentration with a buffer solution containing 0.1% BSA or a culture medium. Residual rRHGF solution (not diluted) should be stored in working aliquots at -70 °C for future use. It is stable for 6 months at -70 °C, and for a few days at 4 °C.

- **Caution**

For laboratory use only. Not for drug or household uses.
